

DETWILER INCIDENT

CA-MMU-014474

INCIDENT ACTION PLAN

OPERATIONAL PERIOD

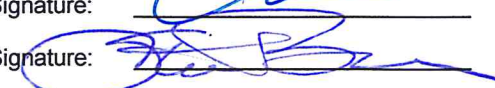

7/25/2017 0700

to

7/26/2017 0700

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: DETWILER		2. Operational Period: Date From: 7/25/2017 Time From: 0700		Date To: 7/26/2017 Time To: 0700	
3. Objective(s):					
Management Objectives -Provide for and maintain public and first responder safety by utilizing the incident safety analysis process. -Be fiscally responsible for all management and suppression actions. -All management actions and efforts will be focused on serving, safeguarding, and protecting the citizens, cultural and historical resources of Mariposa and Tuolumne Counties. -Ensure timely notifications as evacuations occur and that the repopulation plan is carried out in an efficient and organized manner. -Stay committed to interagency coordination and collaboration through honest and transparent communication.					
Control Objectives -Keep the fire in current perimeter in the South and West -Keep the fire South of Greeley Hill Road -Keep the fire West of Highway 140 and Highway 49					
General Situational Awareness: -MAINTAIN L.C.E.S. AT ALL TIMES. Safety zones and escape routes are mandatory. -Ensure all personnel maintain situational awareness. -Rolling material and steep terrain. Remember to maintain good footing. -Keep your hydration up by drinking water and electrolyte beverages. Avoid energy drinks. -Maintain good communications with your supervisors, adjacent forces and crew members. -Maintain awareness of fire weakened trees, ash pits, and burned-out stump holes.

Fire Weather Forecast

FORECAST NO: 7
PREDICTION FOR: Tuesday
SHIFT DATE: July 25, 2017
FORECAST ISSUED: 1900, July 24, 2017

NAME OF FIRE:
UNIT:
Incident Meteorologist:

Detwiler
Madera-Mariposa-Merced
Tom Wright (240-778-5304)

DISCUSSION: Sunny, hot, and dry weather continues Tuesday. Isolated thunderstorms are expected to the east of the fire over the Sierra Nevada again Tuesday afternoon, but they should be less numerous than Monday. These storms are not expected to move near the fire, but gusty outflow winds from the east are possible over the fire during the afternoon and evening. Otherwise, the wind regime will be slope driven through the morning then switch to southwest then northwest and gusty in the afternoon.

TUESDAY:

- **WEATHER:** Mostly sunny. Thunderstorm buildups visible to the east of the fire.
- **WIND (20 FT):** Gusty east outflow winds possible.
 - Mid-slope and below: downslope 1-3 mph through 1000, then becoming upslope 2-6 mph through 1400, then west-southwest 4-8 mph with gusts to 12 mph.
 - On the ridges and exposed areas: becoming southwest and increasing to 5-9 mph through 1400 hrs, then west-southwest 6-12 mph with gusts to 20 mph.
- **MAX TEMPERATURES:** 92-98
- **MIN RH:** 17-23%
- **CHANCE RAIN:** 0% **LAL:** 1
- **INVERSION:** Mid-slope, breaking by 1000 hrs.
- **MIXING HEIGHT:** Near mid-slope in the morning, then rising to 7000 ft after 1000 hrs.
- **TRANSPORT WINDS:** Light and variable through 1000 hrs then becoming southwest 10-20 mph.

TUESDAY NIGHT:

- **WEATHER:** Mostly clear.
- **WIND (20 FT):** Becoming downslope 1-3 mph after 2200. Above the inversion: Northeast around 5 mph.
- **MIN TEMPERATURES:** 62 Valleys to 68 Ridges
- **MAX RH:** 30-40% Ridges to 45-55% Valleys
- **CHANCE RAIN:** 0% **LAL:** 1
- **INVERSION:** Mid-slope developing after 2200

WEDNESDAY:

- **WEATHER:** Mostly sunny.
- **WIND (20 FT):**
 - Mid-slope and below: downslope 1-3 mph through 1000, then becoming upslope 2-6 mph through 1400, then west-southwest 3-6 mph with gusts to 10 mph.
 - On the ridges and exposed areas: becoming southwest and increasing to 4-8 mph through 1400 hrs, then west-southwest 5-10 mph with gusts to 15 mph.
- **MAX TEMPERATURES:** 92-98
- **MIN RH:** 19-25%
- **CHANCE RAIN:** 0% **LAL:** 1
- **INVERSION:** Mid-slope, breaking by 1000 hrs.
- **MIXING HEIGHT:** Near mid-slope in the morning, then rising to 7000 ft after 1000 hrs.
- **TRANSPORT WINDS:** Light and variable through 1000 hrs then becoming southwest 10-20 mph.

3-5 Day Planning Outlook:

Thursday: Clear. Lows 66-72. Max RH: 35-45%. Highs: 96-103. Min RH: 17-22%. Winds: WNW 5-15 mph.
Friday: Clear. Lows 68-74. Max RH: 30-40%. Highs: 98-105. Min RH: 15-20%. Winds WNW 5-15 mph.
Saturday: Clear. Lows 68-74. Max RH: 30-40%. Highs: 98-105. Min RH: 15-20%. Winds WNW 5-15 mph.

FIRE BEHAVIOR

GENERAL:

NFDRS-ENERGY RELEASE COMPONENT =75 (AVERAGE), BURNING INDEX 109, HUNDRED HOUR FUEL MOISTURE 6%, TEN HOUR FUEL MOISTURE 4%, 1 HOUR FUEL MOISTURE 4%, PROBABILITY OF IGNITION 80-100 DURING DAYLIGHT HOURS.

SPECIFIC:

BRANCH I, II, III, V, AND VI

NO MOVEMENT ANTICIPATED. HIGH SPOTTING POTENTIAL EXISTS DUE TO HEAVY GRASS FUELS AND HIGH PROBABILITY OF IGNITION. UNBURNED CANOPY WITH DEAD BRANCHES COULD HARBOR FIREBRANDS. REBURN POTENTIAL IN INTERIOR ISLANDS. DUST DEVILS ON HIGHER RIDGES COULD STIR UP RESIDUAL HEAT.

BRANCH IV AND BRANCH VII

BRUSH FUELS CAN CARRY HIGH INTENSITY FIRE IN CORRECT ALIGNMENT OF WIND, SLOPE AND SUN, BUT OUT OF ALIGNMENT TENDS TO SLOW. FUEL MOISTURES STILL ABOVE CRITICAL. AS THE FIRE PROGRESSES FURTHER NORTH MORE TREE MORTALITY OCCURS.

THE MERCED RIVER AND NORTH FORK OF THE MERCED ARE A CONCERN AS THEY MAY CHANNEL A PERFECTLY PLACED THUNDERSTORM'S OUTFLOW.

AIR OPERATIONS: SUNRISE 0601, SUNSET 2016. NO VISIBILITY ISSUES ANTICIPATED.

SAFETY

USE THIS QR CODE TO VIEW THE TREE MORTALITY MAP FOR MARIPOSA COUNTY. THESE TREES HAVE BEEN DEAD FOR TWO YEARS OR MORE AND ARE READY TO FALL OR SPREAD SPOTFIRES ACROSS YOUR LINES.
http://www.fire.ca.gov/treetaskforce/downloads/maps/TreeMortality_RBP_MMU.pdf
http://www.fire.ca.gov/treetaskforce/downloads/maps/TreeMortality_RBP_MMU.pdf

- THUNDERSTORMS IMPLY STRONG GUSTY WINDS IN MANY DIRECTIONS SIMULTANEOUSLY. HAVE A WEATHER WATCH AND OBSERVE THE SIGNS: VIRGA CLOUDS, THUNDER IS HEARD, LIGHTNING SEEN, DROPS FELT.
- SAFE ZONES MUST TAKE INTO CONSIDERATION CONVECTION WHEN THEY LIE ON RIDGETOPS. ADD ADDITIONAL 2-4 TIMES TO ACCOUNT FOR CONVECTED HEAT

SNAGS

TREES ARE DROUGHT STRESSED, BEATLE IMPACTED AND FIRE DAMAGED

Watch Out

- Ground cover has burned loosening the stability of the root system
- Some of the fire area is within the tree mortality area
- Large oak trees are drought stressed

Mitigation

- Remove the hazard if safe to do so
- Flag and report the hazard to personnel
- Be alert while working and driving in hazard area

GENERAL ILLNESS

FATIGUE, HOT WEATHER, HARD EXHAUSTIVE WORK PUTS US AT RISK

Watch Out

- **Hot weather** causes dehydration, heat exhaustion and serious medical emergencies
- **Hard exhaustive work** increases core temperature, weakens the body's ability to function healthy and causes fatigue
- **Fatigue** Causes poor judgement and decreased work performance affecting safety

Mitigation

- Proper nutrition, rest and hydration reduces fatigue and exhaustion emergencies
- Drink plenty of water and eat right- START EARLY – reduce caffeine input
- Take breaks throughout the work-period and take measures to cool down

TOPOGRAPHY

TOUGH COUNTRY TO WORK IN!

Watch Out

- Steep slopes may cause rolling material hazards
- This terrain will cause quick, unexpected upslope fire behavior
- Significant slip hazard exists throughout the incident

Mitigation

- Post lookouts and monitor changes in fire behavior
- Watch out in areas with steep slopes, watch your footing and drive appropriately
- Listen for rolling rocks and boulders and 'yell out' to others around you

SAFETY COMMUNICATION DETWILER INCIDENT

THUNDERSTORM SAFETY

Approaching thunderstorms from the east may be noted by a sudden reverse in wind direction, a noticeable rise in wind speed, and a sharp drop in temperature. Rain, hail, and lightning occur only in the mature stage of a thunderstorm.

Situation Awareness:

Fire is working its way East following the N. Fork of the Merced River following a diurnal wind pattern. Out flows from possible thunderstorms east over the Sierra's may cause a pronounced increase in fire behavior and sudden change in direction following major drainages.

Observe the 30/30 rule: If you see lightning and hear the thunderclaps follow in less than 30 seconds, take the storm precautions identified below. Do not resume work in exposed areas until 30 minutes after storm activity has passed.

Hazard Control:

- Take shelter in a vehicle or building if possible.
- If outdoors, find a low spot away from tall trees, wire fences, utility lines and other elevated conductive objects. Make sure the place you pick is not subject to flooding.
- If in the woods, move to an area with shorter trees.
- If only isolated trees are nearby, keep your distance twice the tree height.
- If in open country, crouch low, with feet together, minimizing contact with the ground. You can use a pack to sit on, but never lay on the ground.
- If you feel your skin tingle or your hair stand on end, immediately crouch low to the ground. Make yourself the smallest possible target and minimize your contact with the ground.
- Don't group together.
- Don't stay on ridge tops, in wide open areas, or near ledges or rock outcroppings.
- Don't operate landline telephones, machinery, or electric motors.
- Don't handle flammable materials in open containers or metal hand tools.

DEMOB

DETWILER INCIDENT
CA-MMU-014474

- RESOURCES MUST CHECK-IN PRIOR TO THE DEMOB PROCESS.
- TO BE DEEMED EXCESS, SUPERVISORS MUST SUBMIT AN ICS #213 TO THE RESOURCES UNIT.
- RESOURCES REPORT TO DEMOB AT THE TIMES POSTED ON THE TENTATIVE DEMOB LIST, WHICH IS POSTED AROUND THE INCIDENT BASE, AND ON THE QR CODE.
- PRIOR TO REPORTING TO DEMOB, PLEASE RETURN ALL SUPPLIES AND EQUIPMENT.
- RESOURCES WILL GET SIGNATURES FROM THE FOLLOWING UNITS:
 - GROUND SUPPORT (ALL RENTAL VEHICLES WILL BE INSPECTED)
 - TIME
 - TRAINING (IF THEY HAVE A TRAINEE)

RETURN TO DEMOB WITH YOUR ICS 221
THE REMAINING UNITS WILL BE SIGNED OUT VIA RADIO.

- MOTELS
- SUPPLY
- COMMUNICATIONS
- DOCUMENTATION

"Detwiler" CAMMU 014474 Incident Fireline Suppression Repair Plan

I. Objectives

The objective of the Suppression Repair Plan is to mitigate possible adverse effects to resources resulting from fire suppression activities on the Detwiler Fire, in a manner which does not compromise firefighter safety. The mitigations described within this plan have been developed to apply to constructed fire lines, watercourse crossings, access roads, drop points, heli-spots and any other locations disturbed by fire suppression activities. A Repair Specialist will be assigned to ensure that work is done as required and according to the Emergency Fire Suppression Repair Plan. Additional specialists or equipment may be used if the need arises. Specialists will release equipment from the area when their work is completed.

II. General Repair Guidelines

A. Helispots/Staging Areas/Safety Zones

- 1) Re-contour to the original slope as requested by the Repair Specialist.
- 2) Remove soil, and/or breach berms so that runoff can be dissipated. Cross drain these areas to effectively dissipate water runoff.
- 3) Place disturbed vegetation, brush and trees, piled during line construction, on the surface of safety zones and open areas. This may be done with equipment or hand crews.

B. Roads

- 1) Repair roads to pre-fire condition as requested by the Repair Specialist.
- 2) Re-establish existing berms where applicable.
- 3) Breach berms to facilitate drainage, where applicable.
- 4) Clean culverts plugged with soil and rock resulting from fire road use.
- 5) Remove all slash and debris from culvert inlets/outlets.
- 6) Blading or grading of roads may be necessary. Grading shall be done after all suppression repair work is completed for areas accessed by the roads being graded.
- 7) Where vegetative material was cut and deposited adjacent to permanent roads it shall be lopped and scattered to a depth within 30" of the soil surface.

C. Firelines; Hand and Dozer

Install waterbars as described in the guidelines below. Waterbars are designed to intercept, slow and spread the precipitation run-off in order to reduce sediment transport and soil erosion. The idea is to move water off the fireline before it can build up enough energy to erode and transport sediment. Re-establish waterbars and rolling dips using pre-fire locations. Flatten berms along fire lines to match natural contours. Utilize cut vegetation for erosion control on steep dozer and hand lines.

Waterbar Guidelines:

- 1) Spacing: These spacing distances should be used as a guide. Judgment should be used in locating waterbars to minimize erosion potential. It may not be possible or necessary to place waterbars in steep or rocky areas. Install water-bars at the following recommended **minimum** intervals:

Fire line Gradient (% slope)	Minimum Distance Between Water-Bars (feet)
0 to 10	200
11 to 25	100
25+	50

- 2) Location: Locate waterbars at natural slope breaks or to take advantage of natural features when possible. Direct water to unburned areas, and/or resistant surfaces with high vegetation cover when possible. Waterbars should extend beyond the width of the trail and discharge into undisturbed areas, rocky ground, or filter areas well protected with slash and vegetative cover.
- 3) Depth and Width: Waterbars need to be cut into the ground surface; do not simply push up soil. On dozer constructed line waterbar depths should be at least 6 inches; total height from bottom of ditch to

top of waterbar should average at least 12 inches and not exceed 24 inches. On hand constructed line waterbar depths should be at least 4 inches; total height from bottom of ditch to top of water-bar should average at least 8 inches and not exceed 18 inches. The width of the waterbar channel should be enough to handle expected water flows and to avoid plugging when a normal amount of sloughing occurs.

- 4) Angle: Determine the average gradient in percent slope of the fire line being waterbarred. Add 5 to the average gradient. This approximates the angle in degrees for the water bar. Do not install water bars at an angle steeper than 45 degrees as this will increase water velocity rather than slow it down.

D. Watercourses

- 1) Watercourse crossings shall be dipped to original configuration. Waterbreaks shall be installed on each side of channel to divert flow off of trails prior to entering watercourse channel.
- 2) Remove all soil and debris that was placed in any stream channel. A Repair Specialist will review the site for acceptability. If all foreign material cannot be removed with heavy equipment, the material shall be removed by hand. The approaches to the crossing shall be sloped back to prevent future stream bank failure.

E. Archaeological or Historic Sites (if discovered)

- 1) All sites and potential sites shall be flagged and avoided.
- 2) Impacted sites will be reported to the Suppression Repair Specialist as soon as possible.
- 3) If sites are encroached upon, work will stop immediately and the Division/Group Supervisor or Suppression Repair Specialist will be notified.

F. Other Repair Concerns

- 1) Remove all trash from fire lines and other affected areas.
- 2) Repair, broken, damaged fences, and/or gates damaged as the result of the fire control operations will be repaired. (Note: Extent and condition of damage should be documented prior to repairs.)
- 3) Grade and water roads, as needed, that were used during fire control operations. Roads should be out-sloped with rolling dips where degradation of the road prism has resulted from fire control operations.

Prepared by: _____

Len Nielson, Emergency Fireline Suppression Repair Technical Specialist

READ/REAF

Resource Advisors will be scattered among the Divisions inventorying fire line, evaluating impacts, and approving suppression repair work.

Forest Service staff are focused on contingency lines within Pilot, Trumble, and Ferguson located on Forest Service lands.

TRAINING MESSAGE

Training Specialist Now located at Merced Fair Grounds inside of Sierra Hall next to Check-In. All Federal, State, and Local Government agency trainees working on position task books need to register with the training specialist in order to receive proper credit for your assignment. Bring your task book with you.

TOPIC: WRITING EFFECTIVE PERFORMANCE EVALUATIONS

If you do not check in with the Training Specialist before Demob you will not be able to get credit for this incident. Please take a few minutes to come by and see the Training Specialist A.S.A.P.

Jonathan White (562) 324-1811

INCIDENT TRAINING SPECIALISTS

DOCUMENTATION

Unit Logs (ICS-214s) are required by Strike Team Leaders and above. However, Crews, Engines and possibly other contractors working on the line or in camp, may be asked to fill them out, especially if there has been a significant event that may need to be documented, or if requested by your Supervisor.

Thanks for your help and cooperation.

Heather Simon ~ Documentation Unit

FIRING OPERATION CHECKLIST

Location: _____

Date: _____ Time: _____

Firing Supervisor _____

1. Personnel Briefing

- ☐ Objectives
- ☐ Conditions (fire environment)
- ☐ Resource assignments identified
 - ☐ Firing personnel
 - ☐ Holding forces
 - ☐ Lookouts
- ☐ Ignition plan/sequence
- ☐ Communication Plan
- ☐ Contingency Plan
- ☐ Safety issues

2. Go / No-Go

- ☐ All personnel briefed
- ☐ Weather forecast reviewed
- ☐ Resources in place
- ☐ Lookouts posted as needed
- ☐ Anchor and termination firing points identified
- ☐ Communications systems in place
- ☐ Fire behavior forecast reviewed
- ☐ Escape routes and safety zones established and made known
- ☐ Adjoining forces/Air Attack notified

3. Approval Prior To Firing

- ☐ Division Supervisor
- ☐ Branch Director
